

Reference Mapping Table

RN citation keys and titles extracted from the current BibTeX reference list.

Total references: 23

RN key	Title
RN1	SleepLM: Natural-Language Intelligence for Human Sleep
RN2	Sensorlm: Learning the language of wearable sensors
RN3	Ecg-qa: A comprehensive question answering dataset combined with electrocardiogram
RN4	Sensing Cardiac Health Across Scenarios and Devices: A Multi-Modal Foundation Model Pretrained on Heterogeneous Data from 1.7 Million Individuals
RN5	Towards a personal health large language model
RN6	Health-llm: Large language models for health prediction via wearable sensor data
RN7	Sensor2text: Enabling natural language interactions for daily activity tracking using wearable sensors
RN9	PTB-XL, a large publicly available electrocardiography dataset
RN10	Deep learning for ECG analysis: Benchmarks and insights from PTB-XL
RN11	Ecg-fm: An open electrocardiogram foundation model
RN12	An electrocardiogram foundation model built on over 10 million recordings
RN13	A systematic review on foundation models for electrocardiogram analysis: initial strides and expansive horizons
RN14	Vision-language models for vision tasks: A survey
RN15	Exploring the frontier of vision-language models: A survey of current methodologies and future directions. arXiv 2024
RN16	Blip-2: Bootstrapping language-image pre-training with frozen image encoders and large language models
RN19	MIMIC-IV-ECG: Diagnostic Electrocardiogram Matched Subset
RN20	ECG-LM: understanding electrocardiogram with a large language model
RN21	Q-heart: Ecg question answering via knowledge-informed multimodal llms
RN22	Ecg-expert-qa: A benchmark for evaluating medical large language models in heart disease diagnosis
RN23	The ECG made easy
RN24	Morphological abnormalities in baseline ECGs in healthy normal volunteers participating in phase I studies
RN25	Conduction disorders: the value of surface ECG
RN26	AHA/ACCF/HRS recommendations for the standardization and interpretation of the electrocardiogram: part IV: the ST segment, T and U waves, and the QT interval: a scientific statement from the American Heart Association Electrocardiography and Arrhythmias Committee, Council on Clinical Cardiology; the American College of Cardiology Foundation; and the Heart Rhythm Society: endorsed by the International Society for Computerized Electrocardiology

Note: This table is for reference checking only. Verify citation placement against the dissertation text before final submission.
